PRIAM

INDIVIDUALIZED MOBILITY

The demands CYBEX places on the development and manufacture of its strollers are based on a simple aim: to provide modern parents with the best equipment available. The PRIAM is our calling card. Inspired by the clear, timeless design of Ray and Charles Eames, CYBEX has developed a stroller that is not only especially practical and robust, but also a true designer piece.

With its products, CYBEX wants to enable parents to express their style-savvy and trendsetting fashion sense as a family.

That's why CYBEX designed the new PRIAM, with its sophisticated look, pure aesthetic lines and high-quality materials.

And since true design is distinguished by its practicality, the PRIAM is especially handy. Its new 4-in-1 travel system can be individually customized, using just one frame. With the comfortable LITE COT or LUX Carry Cot, the system transforms into a cozy bed on wheels. Paired with the CYBEX infant car seats, it becomes an agile mobile support. Later, the PRIAM serves small children as a safe, comfortable travel companion whose sitting direction can be individually adjusted.

Empowering Parents

Blending futuristic smart technology with the timeless design of our iconic PRIAM, CYBEX introduces a revolutionary e-stroller empowering parents to enjoy effortless travel with their children.

UPHILL SUPPORT

TECHNOLOGY

Along with the regular PRIAM functionality, the e-PRIAM discretely incorporates several technical features.

SENSORS

- *Sensors in the handlebar detect changes in pushing and pulling pressure.*
- *A smart algorithm uses this information to calculate the optimum amount of support you need.*
- *The sensitive areas on the handlebar are indicated by perforation and stitching.*

BATTERY

- *The battery gives the e-PRIAM a range of approx. 8 – 45 km depending on load and conditions.*
- *The Lithium-ion battery can be charged within 3.5 hours.**
- *The charge status can be easily checked via an LED indicator in the rear axle.*

ENGINE

- *Two electric engines add powered support when needed.*
- *Quiet enough to allow your child to sleep uninterrupted.*
- *Located behind the back wheels, the engines are attached to either end of the rear axle.*

* The state of charge of the lithium-ion battery after 3.5 hours is approx. 80%.

ALA CARTE DESIGN

Customize your PRIAM according to your individual taste. A variety of accessories are also available for even more personalization.

CHOOSE YOUR FRAME

The lightweight aluminum frames come in four different variations with individual finishes and selected bumper bar and handlebar colors.

PRIAM FUNCTIONS

ONE-HAND FOLDING MECHANISM

The PRIAM can be folded with one hand into a self-standing package

FLAT, ERGONOMIC LYING POSITION

Due to the PRIAM's full lie-flat position, it can be used from birth

REVERSIBLE SEAT UNIT

The PRIAM LUX Seat can be used parent- or forward-facing

INFORMATION: Measurements folded PRIAM with Seat Pack in mm: L 950 x W 600 x H 365; weight: 12.9 kg

THE PRIAM WITH SKIS

Winter in the city: With the ski attachment to replace the front wheels, the PRIAM can be transformed into a stylish snowmobile.

BEACH-MODE

When faced with ledges and curbs or when out at a sandy beach or in the forest, the PRIAM easily converts into two-wheel mode—manageable with just one hand and without having to remove the seat unit.

EXTRA-LARGE SHOPPING BASKET

The PRIAM impresses with its spacious and easily accessible shopping basket that can be extended if needed. The basket provides plenty of room for spontaneous and stress-free shopping trips with your child.

SEAT AT TABLE HEIGHT

The seat height of the PRIAM is perfectly aligned with the average table height (80 cm) so that it can be used on the go as a mobile child seat in restaurants or cafés.

PRIAM FRAME

The PRIAM frame is available in rosegold, chrome and matt black and impresses with its elegant and luxurious design.

MIOS

THE NEW LIGHTNESS

The MIOS is a milestone in terms of compactness, flexibility and design language—developed as an elegant and practical companion for modern families.

Extra robust with minimal weight, it supports an active and adventurous lifestyle.

The MIOS has been designed to easily overcome all the obstacles of the urban jungle, navigating through the challenges of urban centres with ease and agility.

As with the PRIAM, the new, elegant look of the MIOS ensures that parents can express their style-savvy and trendsetting fashion sense. The design of the MIOS makes an especially high-end impression—thanks to pure, aesthetic lines and high-quality materials.

Its lightweight frame makes the MIOS seem as light as a feather. Its retro-modern design language is complemented by fine, breathable mesh to ensure a balanced climate. In addition, the revolutionary 4-in-1 MIOS travel system allows the use of different attachments on a single frame. With the comfortable LITE COT or LUX Carry Cot, the MIOS is transformed into a luxurious cocoon on wheels. Paired with the CYBEX infant car seats, it becomes an agile mobile support. Later, the MIOS frame serves somewhat older children as a safe, comfortable travel companion whose sitting direction can be individually adjusted.

MIOS FUNCTIONS

BREATHABLE AND LIGHT

The seat's breathable mesh fabric supports the lightweight aspect as well as the climate regulation of the child.

SMALL FOOTPRINT

Thanks to its small footprint and front swivel wheels, the MIOS elegantly handles even the narrowest of paths with ease. Be it at the entrance to the subway or in the chic boutiques of this world.

REVERSIBLE SEAT UNIT

Whether forward or rearward-facing, the seat unit can be turned in the desired direction in an instant.

INFORMATION: Measurements folded MIOS with Seat Pack in mm: L 750 x W 500 x H 330;
weight: 9.9 kg

YEMA

A familiar voice, cozy warmth and that unique smell—a baby carrier intensifies that important bond between parent and child from birth. »Babywearing« nurtures a deep sense of trust between parent and infant, while stimulating the child's cognitive development. The correct carrying method places the infant in the healthy spread-squat position, helping the joints to develop. A baby carrier provides you with almost unlimited mobility: while your baby is in a snug and safe place, your hands are free to deal with the challenges of fast, urban life. The YEMA is now available in 2 versions: YEMA TIE for easy individual adjustment and YEMA CLICK for fast click-on & off—fitting your personal needs.

CARRY POSITIONS

From newborn to toddler (approx. 3.5–15 kg)
with three carrying positions: in front, on the side or on the back

FRONT CARRYING

Babies can be carried facing the chest from birth. The baby carrier encourages the correct posture in the spread-squat position, which can help the hip joints to develop correctly.

HIP CARRYING

Babies that can hold their own head up (from around 3–4 months) can also be carried in the side position. This allows them to rest against mum's shoulder while taking in their surroundings.

BACK CARRYING

Babies with good head and upper body control (from around 6 months) can be carried in the YEMA on the back, making it easy for parents to bear the baby's weight.

SPRING BLOSSOM

LIGHT

The allure of a woman is often in her strength. Sometimes it's hidden, sometimes it's there for all to see. She can be romantic, sensitive and feminine, but deep down she has the instinct to nurture and protect. Taking a flower in full bloom as our symbol of feminine strength, we've created a collection of unparalleled sophistication and elegance. Lush flowers in bold and beautiful colors radiate femininity and romance, sensuality and grace. Evoking a rich abundance that simply takes your breath away. Charming, seductive and luxuriously designed, these are strong statement pieces that are sure to turn heads. Introducing Spring Blossom. Flowers rooted in strength.

KOI FASHION COLLECTION

Crystallized. Calmness. Strength and happiness. The CYBEX Fashion Collection KOI blends the symbolism of the enigmatic underwater creature of Japanese mythology with state-of-the-art technology, materials and tailoring. Just like the underwater jewel itself, modern and fashion-conscious parents can go with the flow of the metropolis thanks to CYBEX »KOI«. Premium appliqués and embroidery on a unique reflecting, crystal-silver material harmonize perfectly with all major prêt-à-porter lines. The PRIAM, MIOS, CLOUD Z i-SIZE, YEMA TIE and matching accessories bring this colorful aquatic animal to life, while helping little ones drift off into fanciful dreams.

CYBEX BY KAROLINA KURKOVA

Love has been a guiding principle of Karolina Kurkova’s twenty years in the fashion world—an attitude of passion and playfulness that shaped her as both a supermodel and a modern parent. So it was only natural that love was the inspiration for her designs for the CYBEX PRIAM, MIOS, YEMA TIE and CLOUD Z i-SIZE.

These designs crackle with the wild and contradictory essence of love: a scintillating palette of vivid colors; cosmic shapes juxtaposed with bold lines; and an iconic pair of cherry-red lips. The CYBEX by Karolina Kurkova Collection lets you show your love with an unforgettable display of fun and bright energy.

LIVING YOUR MOST FABULOUS DREAM

For the first time, CYBEX is connecting with the world of interior design. With the launch of a furniture line and a colorful accessory line that includes a highchair, everything is redesigned to fit seamlessly into the parents' lifestyle. Leading this exciting collection is the internationally celebrated product and interior designer, Moooi owner and industry rebel Marcel Wanders. The »Parent's Collection« is sophisticated yet playful, allowing parents to continue their cultured lives—even with little ones in tow. To go one step further, the new range also lets mums and dads pass on their creativity to the next generation through design-forward furniture that smoothly integrates, creating a dream environment in the home.

HIGHCHAIR

SNACK TRAY
INCLUDED

BY MARCEL WANDERS

Make every meal memorable with our iconic wooden highchair, exquisitely designed for comfort and style. Suitable from 6 months up to 3 years (15 kg), the chair is easily adaptable and features a removable snack and play tray, a harness system and a safety bar. The footrest can be adjusted to the preferred height so your little one will always be comfortable. This outstanding highchair is made from a beech wood frame, chrome-plated steel parts along with an ergonomic, durable plastic seat shell which supports a luxurious cushion that is lavishly embroidered and attached on the back with an iconic flower screw. Who knew mealtimes could be so stylish?

A MATTER OF TRUST

At the heart of all CYBEX products is our D.S.F. Innovation Principle. This stands for a product line that combines clear, unique Design with unsurpassed Safety and intelligent Functionality. We have compiled some of our most important security principles here:

ALWAYS USE A CAR SEAT

Unsecured children are 7 times more likely to be seriously injured or killed in a car crash than those wearing a safety restraint. 83% of secured children avoid physical injury in car accidents (source: German Traffic Control, Fact Sheet #4 May 2009). We advise always using a car seat in accordance with the law. Every car seat, regardless of type, provides a much higher level of safety compared to not using a car seat.

RIDE REAR-FACING FOR AS LONG AS POSSIBLE

Children should ride in rear-facing car seats for as long as possible—ideally until they are about 4 years old (18 kg). In a frontal crash, enormous forces are distributed over a large area of the back of the car seat shell. This significantly reduces stress on the neck, head and chest. Driving Direction Control (D.D.C.) is integrated to increase safety. It helps to prevent the usage of the car seat in the forward-facing position before your child has reached 15 months of age and has grown a minimum height of 76 cm.

CAR SEATS – FOR BIG KIDS, TOO

CYBEX advises against the use of simple booster seats for larger children. This is because without a backrest, the head and torso are not protected in a side-impact collision. All CYBEX car seats provide side-impact protection. In an accident, the very first impact forces are transferred by the side protector thereby reducing the impact forces by approximately one third. The flexible material structure of the car seat's shell additionally absorbs the impact forces, directing them away from your child.

UN R129 (i-SIZE) VS. UN R44

R129 child restraints require children to be rear-facing up to at least 15 months of age. This is done, in part, by setting a minimum height for forward-facing child restraints of 76 cm. In contrast, R44 allows forward-facing child restraints from 9 kg (approximately 9 months). R129 uses the child's height to determine if the seat is appropriate for them. This makes it easier for a parent to find the correct size of the car seat for their child. However, this differs from R44, which uses weight only.

SOLUTION Z i-FIX

UN R129/03, 100 – 150 cm (approx. 3 to 12 years)

PATENTED RECLINING HEADREST

Helps to prevent the child's head from falling forward when asleep

AUTOMATIC HEIGHT AND WIDTH ADJUSTMENT (12 POSITIONS)

Head and shoulder protectors grow with the child for a more comfortable fit

AIR VENTILATION SYSTEM

Helps maintain a comfortable seating temperature, even on hot days

CYBEX SAFETY PADS

The head is actively guided into a safer position

OPTIMISED LINEAR SIDE-IMPACT PROTECTION (L.S.P. SYSTEM PLUS)

Reduces the forces of a side-impact in combination with the shoulder and head protectors

RECLINING BACKREST

For a great adjustment to the vehicle seat

ISOFIX

Extra stability and safety

3-POSITION RECLINING HEADREST

AVERAGE HEADREST VS PATENTED RECLINING HEADREST

The CYBEX patented 3-position reclining headrest shifts the balance point of the child's head slightly back and helps to prevent the head from falling forward when the child is asleep. In the event of a side-impact collision,

the child's head can remain within the safety zone of the seat. The patented head protection ensures a more comfortable sleeping position and enhanced safety compared to conventional systems.

SENSORSAFE

SAFE.SMART.CONNECTED.

THE SENSORSAFE SAFETY TECHNOLOGY

PEACE OF MIND FOR YOU, BETTER
SAFETY FOR YOUR CHILD.

CYBEX fuses smart technology and smart design with the introduction of SensorSafe: helping you keep track of the safety and health of your child.

Available for several CYBEX Platinum and Gold i-SIZE car seats, the SensorSafe Clip attaches to the harness system.

SensorSafe provides essential alerts to help prevent critical situations: when your child unbuckles the clip, if your child is put at risk of vehicular heatstroke because of ambient temperature changes or from being left alone in the car, or if your child has been seated for too long. All alerts are received via Bluetooth on your smartphone through a user-friendly app that also provides guidance on installation, how-to videos, FAQs and more.

The technology that took the US market by storm!

AT ALL TIMES

SAFETY HARNESS CONTROL

The SensorSafe clip helps prevent the child from slipping out of the harness. If your child manages to open the clip, you will be instantly alerted via push notification on your smartphone.

Hot cars can be fatal even
when the outside temperature
is as low as 16°C

kidsandcars.org Database (1998-2015)

TEMPERATURE & CHILD ALONE WARNING

The SensorSafe clip monitors the ambient temperature of your car to prevent your child from overheating or overcooling. When temperatures become too hot or too cold, the app will inform you via push notification on your smartphone. Changes in temperature can become especially dangerous if your child is left unattended in the car. In the event your child is left alone the SensorSafe clip is able to send reminder notifications directly to your smartphone. If desired SensorSafe can also alert emergency contacts and share the location of the car.
